

OLIVE OIL

A light green, unripe fruit with pit has 15-35% oil → the best for consumption

Fully ripe, black olives → the production of olive oil

20 kg of olives (the average yield of an olive tree) → 3-5 liters of oil

"Cold pressing" → the best method, without adding substances and heating

The natural characteristics → unchanged

"Cold pressing" → "virgin oil"

The method of pressing → declared on the packing label
